

BRANSCOMBE PROJECT WINTER TALK

Bats in Branscombe

by Ian Crowe:

Ian Crowe has been working with the East Devon AONB and Natural England on the bat population of Beer Quarry Caves and the surrounding area.

He'll be asking:

Why do so many species of bat live in this area?

What do they look like and where do they live?

What do they feed on and how do they rear their young?

Where do they go in the winter?

And finally, how can they be protected?

Monday 22 February, 7.30 pm, in the Village Hall
